

QUALITY REQUIREMENT CODES
Frank Roth Company

Supplier Requirements

Suppliers need to conform to the following Frank Roth Co. (FRC) Quality Requirements

1. Record retention period as determined by contract -7 years minimum
2. Right of Access by FRC, our customers, or regulatory authorities *to all applicable areas of all facilities and at any level of the supply chain* to review all applicable records, and verify product conformity.
3. Flow down of requirements to sub-tiers is required as applicable in the purchasing documents
4. Certificate of compliance to the purchase order is required
5. Chemical and physical analysis report of raw material is required , if noted by the purchase order
6. **Notification of non-conformances *to obtain approval-no repair or use as is decisions to be made on characteristics unless approved in writing by FRC.***
7. 1st article Inspection requirements (not required unless otherwise noted.)
8. Government Source inspection (not required unless otherwise noted.)
9. Inspection of product at your facilities by FRC prior to product release (if required, this will be noted on the PO)
10. Inspection reports submittal (if required, this will be noted on the PO)
11. Unless specified on the drawing or other issued specification-removal of all foreign objects (chips, etc) that could result in damage or failure is required.
12. Personnel Qualifications (None unless required by specification(s), FRC where noted, and Supplier requirements to ensure product conformance (e.g.: competency)
13. Traceability to raw materials used, if supplier sources the material.
14. Acceptance of product by FRC does not absolve the supplier of responsibility for anomalies/defects later detected.
15. Requirements for test specimen's submittal if any will be noted on the PO.
16. Quality Management System Requirements –maintain or improve from original Acceptance by FRC. Also, any additional requirements, if any, will be stated on the PO.
17. Notification is required to FRC of any changes in suppliers, manufacturing facilities, and any significant process changes related to the product/process required by FRC.
18. In the event the supplier outsources, the supplier must use FRC's customer approved special process source and provide certification from that source. In addition, for other than special processes or customer designated sources, the supplier is required to have complete control. Essentially, the same is true for work temporarily or permanently transferred.
